50 word description

Music Care Training is a 3-level, 52-hour certificate program that trains professional, family and volunteer caregivers in the theory and application of music in care. The training is complimentary to other scopes of practice, particularly allied health providers, providing these caregivers with musical tools and theoretical context to enrich their care practice.

100 word description

Music Care Training is a 3-level, 52-hour certificate program that trains professional, family and volunteer caregivers in the theory and application of music in care. The training is complimentary to other scopes of practice, particularly allied health providers, providing these caregivers with musical tools and theoretical context to enrich their care practice.

The objective of MCT is to support caregivers in integrating music into regular care practice by:

- Developing understanding of the music care approach, musical elements, and an evidence base for using music in care
- Giving tools and strategies to use music more freely and intentionally in professional and personal life
- Creating an individualized music care initiative for care context
